

THE MOUTH OF SILENCE

A vertical slice of The Chronicles of Demise

A scholar with no weapon, a language that rewrites the world, and a vault the gods erased from every map.

Speak Kha'shul

Read the sky

Sit by the fire

Cross the glass

THE PITCH

A playable chapter of my novel *The Chronicles of Demise*. Lyssia, expelled for heresy, leads a thief, a mercenary and a fake god to the Mouth of Silence. She wins by **reading**: Kha'shul, the Ancients' language, doesn't ask the world for anything. It defines it. **KEL-DUUN**: the stone rises.

DESIGN PILLARS

- **Reading is power:** no combat; every obstacle yields to understanding.
- **One rule at a time:** each puzzle teaches one grammar rule, then tests it.
- **The crew talks:** humour carries the lore.
- **Power rewrites you:** Conceptual Bleed.

SYSTEMS

- A constructed language: 10 words, 5 rules, glyphs.
- Astromancy: decode pulsing stars, plot the quickest course.
- Branching dialogue with Bleed variants; a crew that moves like people.
- Autosave, voice-over, web and desktop builds.

MY ROLE

Story and world (my own manuscript), game and narrative design, the Kha'shul language, writing, casting and direction. Built in Unity (C#) with an AI coding assistant (Claude): I set the design and the words and play-tested every phase.

DESIGN PROCESS

Six playable phases and an external playtest. The star chart was "much harder than the language puzzles": I made every rule visible (beats that write themselves out, wrong answers that say why) without changing the puzzle.

IN THIS PORTFOLIO

- Game Design Document
- System and story flowcharts
- Kha'shul language reference
- Script sample
- Playable build: ueren.itch.io/the-mouth-of-silence
