Design: majors are the chapter rewards of the Fool's Journey, earned at each chapter's gate in the tarot's own order; suit levels give a random card of the suit the player just collected on the board, so every player's deck grows differently. A level always keeps the card it gave; replaying it with 5+ moves left upgrades that card to foil.

Fixed (v2), found while building this catalogue: in v1 the suit rotation (4 suits) lined up with the major cadence (every 4th level), so every Pentacles level gave a major and Pentacles cards only arrived late, through the fallback. The journey moves majors to chapter gates and cycles the suits over the three suit slots of each chapter, so every suit has 15 or 16 card levels for its 14 cards. Verified by the JourneyTests and CardRulesTests suites.
